Sumo Cattle Co Michifuku K430 was selected by us because of his outstanding pedigree. We wanted a sire to use over our Shimane/Tottori influenced females and with K430 having both Michifuku, TF148 and Terutani 40/1 in the pedigree he provides the ideal combination for us. The sire himself is a phenotypically upstanding and correct bull and being free of recessives has added to this exciting sire. His pedigree lends him to being ideal for use as an F1 sire or over fullblood cows with that Shimane or Tottori background.
